

Stanford - Biohazard

DATE: November 2, 1976

To : Investigators with current or imminent research project involving recombinant DNA

FROM : Allan M. Campbell, Chairman, Recombinant DNA Panel

SUBJECT: Application for Approval of Recombinant DNA Research.

According to NIH rules, the University, on advice of our Panel, must complete a Memorandum of Understanding and Agreement with NIH by November 15 on all on-going projects. Since the Panel does not intend to rubberstamp anything without going over it, it is urgent that the accompanying form be completed quickly and returned, together with a copy of the grant application that you submitted to NIH, to Jack Sidlow, Health and Safety Office, 71 Encina Hall as soon as possible. We will then do our best to process them by the required deadline.

Thanks very much for your cooperation.
